

Ethical Hacking Workshops & Labs – Gained hands-on experience in penetration testing, vulnerability scanning (Nmap, Nessus), and exploitation using Metasploit in controlled environments.

Ethical Hacking Workshops & Labs – Gained hands-on experience in penetration testing

- **Ethical Hacking Workshops & Labs** – Gained hands-on experience in penetration testing, vulnerability scanning (Nmap, Nessus), and exploitation using Metasploit in controlled environments.

Phishing Campaign Simulation – Designed and executed simulated phishing campaigns to test user awareness and analyze security posture.

Phishing Campaign Simulation

Secure Enterprise Server Infrastructure (Rocky Linux & Ubuntu) – Built and documented a secure multi-service server environment with static IP/DNS, cross-platform NFS, Apache web server (with HTTPS via private CA), and a full email system (Postfix + Dovecot with SSL/TLS). Validated end-to-end integration and security through rigorous client testing (Thunderbird).
